Important Public Works.—In 1899-1900 a railway was opened from Manmád on the Great Indian Peninsula Railway, to Hyderabad. It only traverses a few miles of the Chándor

and the north of the Yeola taluka. Along the five miles of road Násik City and Násik Station a small Tramway constructed maintains communication, carrying over 240,000 passengers in 1910-11 there were 334 miles of metalled road and 283 miles of road suitable for fair weather traffic only. The new roads and their importance constructed since 1875 are as follows:—

Famine.—Famine occurred in 1896-97, mainly due to failure of crops in the affected tracts from the want of seasonable rain. The whole district was affected. Relief works were opened and continued for fourteen months. The maximum number of persons receiving relief reached 35,772 in March. In 1899-1900 the rains failed and the district was again visited by famine. The area affected was 5,557 square miles and the crop outturn was 49 per cent. of normal. Relief works were opened in September 1899 and continued till October 1902 with an intermediate break of four months. The maximum daily

average number relieved was 105,664 in March, 12,207 being gratuitously relieved. Special relief to weavers in their own craft was also given during the famine. The death-rate in the district per mille was 76.00. The total number of deaths from all causes on relief works were 4,666, of which 1,374 were due to dysentery and diarrhoea and 1,073 to cholera. The percentage proportion of sexes and children among the relief workers in the district was 35 men, 50 women and 15 children. The average wage per worker unit was Re. 0-1-7. In 1900-01 an area of 2,900 square miles was again affected by scarcity. The highest number in receipt of relief on this occasion was 13,091, 6,418 being gratuitously relieved. The death-rate during the year was 38.50 per mille. In 1901-02 the season was fair. But the relief works, which were closed in December 1901, were re-opened in April and were continued for a period of seven months. The total daily average number of workers was highest in August 1902, about 900 being in receipt of gratuitous relief. The mortality in the district during the year was 30.53 per mille. (For further details see Table XIII.)

Plague.—Indigenous plague first occurred at Igatpuri towards the latter part of July 1897. The infection was attributed to cases imported from Bombay. With Igatpuri several places in the district became infected, of which the most important were Nāsik town and Manmād. The district suffered very severely between 1899 and 1905 and again in 1911.
